

WORLDWIDE ENGLISH COLLEGE PRESS

Production Specification

The International English Fluency Certificate — The Complete Curriculum

Print · Typography · Colour · Illustration · Assets · Finishing · Checklist · Style guide

WEC-LC/IEFC/CUR/2026/E01 · Document ID RP6Y-KFPF-2NJ5-8SW9 · Issue E01.R00.01 · Generated 2026-08-06

1 · Print specification

Everything a printer needs to quote and to run the job.

TRIM SIZE	210 × 297 mm (A4 portrait)
BLEED	3 mm on all four edges of the cover artwork. The text block is supplied without bleed; no element runs to the edge.
EXTENT	441 pages, self-cover excluded
SPINE WIDTH	26.6 mm, calculated as $(441 \div 2) \times 0.115$ mm caliper plus 1.2 mm for the cover boards and adhesive
COVER SPREAD	452.6 × 303 mm including bleed
TEXT STOCK	100 gsm uncoated offset, high opacity, natural white. Uncoated because this is a book a teacher writes in.
COVER STOCK	300 gsm one-sided board, matt laminate outer. The laminate protects a dark ground, which shows every handling mark without it.
BINDING	Perfect bound (PUR recommended at this extent — the book must open flat enough to be read on a desk while teaching).
TEXT PRINTING	Four colour process throughout. The level identities are process builds, not spot colours; the book is designed so no spot is required.
COVER FINISHING (OPTIONAL)	Gold foil on the title, crest and emblem, with a blind deboss on the border rule. The artwork is supplied so that it also reads correctly printed flat in process colour, with no foil.
COLOUR MANAGEMENT	Supply is RGB PDF. The CMYK values in section 3 are uncalibrated conversions provided as a starting point; convert to the press profile and proof.
MARKS	Corner crop marks only, outside the bleed. No registration or colour bars in the artwork.
ACCESSIBILITY	The text-block PDF is tagged with a document outline, so it is navigable by screen reader and by bookmark.

2 · Typography specification

Two families, one for reading and one for scanning. No third.

The distinction is functional rather than decorative. Everything a reader reads continuously is set in the serif; everything a reader looks *for* — a stage heading, a timing, an answer key, a folio — is set in the sans. A teacher scanning a lesson for the speaking activity finds it by texture before reading a word, and that only works if the rule is never broken.

SERIF (READING)	Cambria, "Nimbus Roman", Georgia, "Times New Roman", serif
SANS (APPARATUS)	Calibri, "Nimbus Sans", "Segoe UI", Arial, sans-serif
BODY SIZE	9.6 pt on 1.58 line height
MEASURE	31em — approximately 62 characters, inside the 45–75 band that keeps long reading comfortable
ORPHANS AND WIDOWS	3 lines minimum, enforced in the stylesheet

The scale

ROLE	SIZE	FAMILY	TREATMENT
Cover title	46 pt	Serif	Foil gradient, embossed lighting
Level numeral	118 pt	Serif	Blind emboss on the level wash
Level title	34 pt	Serif	Bold, level ink
Chapter title	19 pt	Serif	Bold, gold-to-platinum rule beneath
Module title	16 pt	Serif	Bold, with numeral panel
Lesson title	12.5 pt	Serif	Bold, kind label above
Lead paragraph	11 pt	Serif	Primary ink
Body	9.6 pt	Serif	Warm charcoal
Apparatus	8.4 pt	Sans	Stage headings, options, keys
Caption	7.6 pt	Sans	Slate grey
Micro label	6.6 pt	Sans	0.16em tracking, uppercase

SUBSTITUTION POLICY

Both stacks name metric-compatible fallbacks in order. No font file is embedded from a third party and no webfont is fetched, so the publication cannot fail to render because a licence lapsed or a CDN went down. If a production house prefers a licensed pair, substitute at the same optical size and measure — the grid is set in points, not in glyphs.

The stage icon language

19 icons, one per lesson stage, drawn on a single 24-unit grid with a 1.6-unit stroke, round caps and joins, and a 2-unit optical margin. That shared construction — not a shared style — is what makes them one family. They are stroked rather than filled so they hold at 8 pt on uncoated stock, where a filled mark of that size fills in to a blot, and they inherit `currentColor`, so a stage icon is always exactly the colour of the level it sits in and no per-level asset exists.

WHY THESE REPLACED THE PREVIOUS GLYPHS

The earlier edition marked each stage with a typographic character — ◆, ≈, ✎. Those come from different type designers working to unrelated briefs, so set beside each other at 8 pt they had different weights and optical centres and the column of marks down a lesson read as a jumble. A glyph is also at the mercy of the font stack: a book whose navigation depends on ✎ is a book that can lose its navigation to a missing character.

3 · Colour specification

Fourteen colours, each with a stated role. A palette without roles is a mood board.

Royal Blue and Royal Gold sit almost exactly complementary on the wheel — the relationship that has been the livery of universities and civic institutions for eight centuries. Deep Crimson completes a split-complementary triad: related enough to belong, distant enough to alarm when it is used, which is what an accent is for. Crimson appears only on assessment and on statements of what is not evidenced. It is never decorative.

	COLOUR	HEX	RGB	CMYK*	ROLE
	Royal Blue The College's own blue. Everything structural is set in it.	#1F3E7C	31 62 124	75 50 0 51	Primary. Display type, level identity, institutional voice.
	Royal Gold Rationed. Gold everywhere means gold nowhere. Never used for type on light paper — see Bronze.	#B4933E	180 147 62	0 18 66 29	Secondary. Rules, ornament, marks of award, foil on dark grounds.
	Deep Crimson Never decorative. If it appears, it means something.	#8C1F2F	140 31 47	0 78 66 45	Accent. Assessment, answer keys, statements of what is not evidenced.
	Midnight Navy Deeper than the primary so gold reads as foil against it.	#0F1D38	15 29 56	73 48 0 78	Cover ground, spine, divider fields.
	Imperial Blue Bridges midnight and royal so the blues read as one family.	#16306B	22 48 107	79 55 0 58	Secondary display, running heads, tinted panels.
	Rich Burgundy Crimson taken to book-cloth weight. Specified for finishing, not for ink on the page.	#5E1A26	94 26 38	0 72 60 63	Material colour: case cloth, second ribbon, head bands.
	Ivory Warm white. Reads as stock, not as an unprinted screen.	#FBF8F0	251 248 240	0 1 4 2	Title-page and divider paper.
	Pearl White A hair cool, so long reading does not tire the eye.	#FAFBFC	250 251 252	1 0 0 1	Text paper for the curriculum pages.
	Soft Cream The tint that carries editorial apparatus.	#F6F1E4	246 241 228	0 2 7 4	Panels, sidebars, quoted matter.
	Champagne Gold Gold at 20% weight — visible without competing with the type.	#E4D5A8	228 213 168	0 7 26 11	Hairlines and ornament on dark grounds.
	Bronze Royal Gold reaches only 2.8:1 on the text paper, so it may never carry type there. Bronze is the same hue taken to 6:1 — the reading-safe gold.	#7A5C2E	122 92 46	0 25 62 52	Gold set as TEXT on light paper; guilloché shadow; foil lowlights.
	Platinum Cool grey with a blue cast so it belongs to the primary.	#D8DCE3	216 220 227	5 3 0 11	Rules, table borders, ghosted states.
	Slate Grey Recessive by design: apparatus should not read as content.	#6B7280	107 114 128	16 11 0 50	Metadata, captions, timings, folios.

COLOUR	HEX	RGB	CMYK*	ROLE
 Warm Charcoal Not black. Pure black on warm paper reads as a hole.	#2E2A26	46 42 38	0 9 17 82	Body text.

* Uncalibrated conversion. Provided as a prepress starting point, not as final separations — a saturated blue in particular will need adjustment against the press profile.

Contrast, measured

Every pairing the design actually uses, measured by the WCAG relative-luminance formula. This table is computed at generation: if a colour changes and a pair falls below its floor, the row turns and this document says so.

PAIRING	FOREGROUND	GROUND	RATIO	FLOOR	RESULT
Body text on text paper	 #2E2A26	 #FAFBFC	13.74:1	4.5:1	Meets
Display type on text paper	 #1F3E7C	 #FAFBFC	9.94:1	4.5:1	Meets
Display type on title stock	 #1F3E7C	 #FBF8F0	9.71:1	4.5:1	Meets
Micro labels on text paper	 #7A5C2E	 #FAFBFC	5.97:1	4.5:1	Meets
Micro labels on panel tint	 #7A5C2E	 #F6F1E4	5.48:1	4.5:1	Meets
Accent on panel tint	 #8C1F2F	 #F6F1E4	7.92:1	4.5:1	Meets
Apparatus grey on text paper	 #6B7280	 #FAFBFC	4.67:1	4.5:1	Meets
Champagne on cover ground	 #E4D5A8	 #0F1D38	11.48:1	4.5:1	Meets
Royal Gold hairline on text paper	 #B4933E	 #FAFBFC	2.82:1	n/a	Rules only — carries no type

Level identities

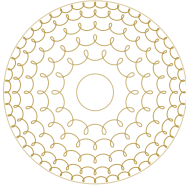

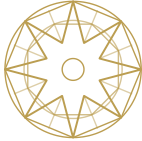

Six palettes, one family. Close in value and saturation so the book reads as one work rather than as six pamphlets bound together, and separated enough that a reader opening the volume anywhere knows which level they are in before reading the running head.

LEVEL	NAME	INK	MID	WASH	INK ON WASH	CEFR
I	Foundation	 #1B2F5C	 #4C6AA8	 #EDF3FF	11.73:1	A1
II	Elementary	 #003844	 #00798F	 #E6F6FB	11.48:1	A2
III	Intermediate	 #003D22	 #297E54	 #E9F7EE	11.24:1	B1
IV	Upper Intermediate	 #442C00	 #8D6310	 #FAF2E6	11.77:1	B2
V	Advanced	 #551C1D	 #A05150	 #FFEEED	11.91:1	C1
VI	Mastery	 #43214D	 #855793	 #F8EFFF	11.98:1	C2

4 · Illustration specification

Every mark in this publication is computed from its own geometry at render time.

There is no stock artwork, no traced illustration, no licensed image and no photograph. That is partly a production decision — vector marks are resolution-independent, cannot fail to load, and carry no licence question into a reprint — and partly a truthfulness one: a stock photograph of a model captioned as a student of this College would be a fabrication, and this publication does not contain one.

MARK	NAME AND SOURCE	CONSTRUCTION	WHERE USED
	Institutional crest ornament.mjs · crest()	Shield, open book, six ascent bars, founding letters.	Front cover, spine, title page, frontispiece, level dividers, back endpaper.
	Guilloché rosette ornament.mjs · guillocheRosette()	Five concentric hypotrochoid rings, petal counts 48/36/28/20/14.	Front cover medallion, back cover seal, frontispiece plate, level dividers.
	Guilloché band ornament.mjs · guillocheBand()	Counter-phased sine trains, five line pairs.	Cover foot, back cover foot, level divider foot, colophon.
	Girih rosette ornament.mjs · girihRosette()	Eight-fold star from the octagon, with interlace ring.	Level divider ground, endpapers, cover texture field.
	Border system ornament.mjs · frame()	French rule set — thick, gap, thin — with mitred corner brackets.	Front and back covers, title page, level dividers.
	Corner fan ornament.mjs · cornerFan()	Quarter rosette on the same eight-fold division.	Cover corners, level divider corners.
	Fleuron ornament.mjs · fleuron()	Centred lozenge flourish between two rules.	Half title, dedication, contents break, colophon, back cover.

Photography

Six plates, one facing each level divider, and none anywhere else. Photography is placed only where the reader crosses into a new level; a photograph beside a lesson stage competes with the thing a teacher is trying to read.

SOURCE	Adobe Stock, licensed for editorial and commercial use. Asset references are printed in the colophon.
GRADE	Duotone, computed per level: luminance mapped onto a ramp from the level's ink to its wash. The grade is derived from the palette, so changing a level hue changes its plate.

EFFECTIVE RESOLUTION	Each plate is placed at 2,400 px across a 168 mm frame: 363 DPI , above the 300 dpi offset floor with headroom for slight enlargement. Verified on every build at the print measure, because a file that is 363 dpi in a 168 mm frame is 180 dpi in a 340 mm one — only the ratio matters.
RESAMPLING	Sources are 5,631–8,192 px and are resampled to the placed size before binding. Embedding an 8,192 px image in a 168 mm frame does not make the plate sharper — the printer's RIP downsamples it anyway — it made a 42 MB PDF. Resampled, the same book is 21 MB. Full-resolution originals are retained outside the publication for any future edition that places them larger.
PLACEMENT	Always a verso, facing its divider on the recto, so a level opens as a single spread composition.
BLEED	None. The plates fill the type area (168 × 265 mm) and stop at it. Full bleed is not achievable in this pipeline — see the limitation noted below.
REPRESENTATION	Selected for a genuine spread of geography, ethnicity, age and gender across the six, and for documentary rather than staged-corporate register.

WHY THE PLATES DO NOT BLEED

An element wider than the page content box causes this rendering engine to scale the entire document down to fit. A full-bleed plate silently rescaled all 487 pages to about 91% — every type size below specification and a spine computed from a false extent — while every content check still passed. The plates are therefore held within the type area, and a build-time assertion now fails if any element exceeds the content box. If this publication is ever re-originated in a professional layout application, full bleed should be restored there.

Figures

Five figures in the front matter, each computed from the curriculum rather than drawn to illustrate it: bar lengths are proportional to counts, frequencies are tallied across all authored items, and every label is generated with the mark it labels. The constraint is deliberate and it has teeth — these figures become wrong the moment the curriculum changes, which is the property that separates information design from decoration.

FIGURE	WHAT IT MEASURES	SOURCE
1 · The ascent	Words of lesson content per level, with words per named stage.	<code>diagrams.mjs · ascentChart()</code>
2 · Sixty modules	Item composition of every module, as small multiples.	<code>diagrams.mjs · architectureGrid()</code>
3 · Anatomy of a lesson	Stage frequency across every named stage, with median timing.	<code>diagrams.mjs · lessonAnatomy()</code>
4 · Assessment map	Quizzes, questions, assignments, rubric criteria and competency mapping.	<code>diagrams.mjs · assessmentMap()</code>
5 · A learner's path	The module cycle, the level, and the ascent, at three scales.	<code>diagrams.mjs · learnerJourney()</code>
6 · The spiral, measured	Every module weighted by the later lessons that name it.	<code>diagrams.mjs · spiralMap()</code>

A FIGURE THAT CANNOT BE WRONG WAS NEVER SAYING ANYTHING

Figure 1 was drawn twice. The first version plotted duration against item count under the caption *the six levels are not six equal steps*, and rendered as six identical columns — because they are six equal steps. The chart was accurate; the caption was not. Both were replaced rather than the caption alone, and the note recording that stands in the published figure.

LINE WEIGHTS AT PRESS

Guilloché and girih line-work runs between 0.28 pt and 0.70 pt. Below roughly 0.25 pt fine gold line-work on uncoated stock will begin to drop out. Proof the cover and the frontispiece plate on the specified stock before committing the run; if the line-work thins, raise the stroke weights in ornament .mjs rather than scaling the artwork.

5 · Asset inventory

What is delivered, and what generates it.

Deliverable files

FILE	PURPOSE	FORMAT	SIZE	STATE
IEFC Complete Curriculum.pdf	Press-quality text block	PDF, A4 portrait, tagged, bookmarked	26.62 MB	Present
IEFC Cover Artwork.pdf	Cover spread	PDF, single page, trim + bleed, no marks in live area	0.52 MB	Present
IEFC Complete Curriculum.docx	Editable companion	DOCX, A4, styled headings, navigable	1.48 MB	Present
IEFC Production Specifications.pdf	This document	PDF, A4 portrait	0.52 MB	Present

Source

The publication has no binary assets. Its entire source is text, which means the whole book — content, colour, ornament, identifiers — is diffable, reviewable and reproducible.

MODULE	RESPONSIBILITY	STATE
scripts/publication/curriculum.mjs	Extracts every lesson from the academic database and parses it into typed stages.	Present
scripts/publication/design.mjs	The fourteen-colour system, the six level palettes, the type system, the stage marks.	Present
scripts/publication/ornament.mjs	Every drawn mark: guilloché, girih, crest, borders, fans, fleurons, foil.	Present
scripts/publication/identity.mjs	Publication identifiers and the content digest.	Present
scripts/publication/covers.mjs	Cover spread, spine calculation, front matter, back matter, register of omissions.	Present
scripts/publication/render-flagship.mjs	Renders the text block and the cover artwork.	Present
scripts/publication/render-curriculum-docx.mjs	Renders the editable companion.	Present
scripts/publication/render-specs.mjs	Renders this specification.	Present
functions/_lib/registry/qr.js	The QR encoder, shared with the credential system.	Present

External assets

No embedded font file, no icon set and no CDN reference. The verification QR is generated by the College's own encoder. The only external assets are the six licensed photographs listed in the colophon, supplied as JPEG at source resolution.

6 · Finishing specification

Where the special processes fall, and — as important — where they deliberately do not.

Every process below is **optional**. The artwork is built so that the book reads correctly printed flat in four-colour process with no finishing at all; the finishing raises a good book to a presentation object, and its absence never leaves a hole where an effect should have been. That is a deliberate constraint: a cover that only works foiled is a cover that fails the moment the budget moves.

Foil stamping

FOIL	Matt gold pigment foil. A bright mirror foil fights the guilloché — the line-work is 0.3 pt and a specular finish destroys it under raking light.
FRONT COVER	Title block (<i>The International English Fluency Certificate</i>), the crest, and the IEFC emblem ring. Not the subtitle, not the edition line, not the guilloché rosette — a foiled rosette at this line weight will fill in.
SPINE	Title and crest only.
BACK COVER	None. The back is a reading surface; foil on both faces makes the object look like packaging.
REGISTRATION	Foil to be held to ± 0.3 mm against the printed rules. The border system is drawn as a single SVG so the corners meet exactly; a foil that misses by more than that will read as a mitre error rather than a registration one.

Emboss and deboss

BLIND DEBOSS	The outer border rule on the front cover, 0.25 mm depth, single level. It gives the frame a physical edge without adding ink.
REGISTERED EMBOSS	The crest only, 0.35 mm, sculpted die, registered to the foil. Nothing else on the cover is embossed: a cover with three embossed elements reads as a certificate rather than a book.
DO NOT EMBOSS	Type below 14 pt, the guilloché, the girih field, and the QR. Fine line-work distorts under a die and a distorted QR does not scan.

Spot UV

WHERE	The guilloché rosette on the front cover and the guilloché band at the foot, on the matt laminate. Gloss varnish over matt is what makes engine-turning read as engraving rather than as printing.
WHERE NOT	Never over foil (the varnish dulls it) and never over the QR (specular reflection defeats a phone camera at an angle).
TRAP	0.2 mm inside the artwork edge, so a slight misregistration shows as a hairline of matt rather than a halo of gloss on the ground.

Ribbon, head and tail

RIBBON MARKER	Recommended at this extent: one ribbon, 6 mm woven satin, in the Royal Gold of the identity, cut on the bias to resist fraying, length = page diagonal + 25 mm so it protrudes when closed. A teacher's manual is used at two places at once — the lesson and its rubric — so a second ribbon in Rich Burgundy is worth the small cost.
---------------	---

HEAD AND TAIL BANDS	Rich Burgundy  and Ivory striped. The second ribbon and the case cloth take the same Rich Burgundy: it is specified as a material colour rather than an ink, and this is the only place in the system it appears.
NOTE	Ribbons and head bands require a sewn or notch-bound block. If the job is run as standard perfect binding, omit both rather than glue them in — a glued-in ribbon tears the first spine it is pulled against.

Paper and board

COMPONENT	STOCK	WHY
Text block	100 gsm uncoated offset, high bulk, natural white, FSC	Uncoated because this is a book a teacher writes in. High opacity so the reverse of a tinted module opener does not show through the lesson behind it.
Level dividers (optional upgrade)	140 gsm uncoated, same shade	Six leaves only. A heavier divider is felt before it is seen — the reader's thumb finds the level before the eye does.
Endpapers	150 gsm uncoated, solid Midnight Navy, printed girih field in Royal Gold	The endpaper is the first and last thing seen. A plain white endpaper on a foiled cover is the single clearest sign a budget ran out at the end.
Cover board	300 gsm one-sided FBB, matt laminate outer	Matt laminate protects a dark ground, which shows every fingerprint without it, and is the ground spot UV needs to register against.
Case (if cased in)	2.5 mm greyboard, cloth or printed-and-laminated wrap	At 477 pages a cased binding is defensible. Specify a 3 mm square.

Binding

RECOMMENDED	Section-sewn, then either cased in or drawn on with a soft cover. At 441 pages the block is thick enough that a glued-only spine will crack the first time it is opened flat on a desk, which is the posture this book is used in.
ACCEPTABLE ALTERNATIVE	PUR perfect binding. Stronger and more flexible than EVA and it will open acceptably flat; specify PUR explicitly, because EVA is the default and EVA at this extent will fail.
NOT ACCEPTABLE	Saddle stitch (impossible at this extent) and spiral or wire-o (no spine to carry a title, and this book must be findable on a shelf).
GRAIN DIRECTION	Parallel to the spine, without exception. Cross-grain at this bulk gives a block that will not lie flat and a cover that curls in a damp room.
SIGNATURE COUNT	441 pages — confirm the imposition with the printer. The text block is designed so that the six level dividers fall on a recto; that imposition is computed at generation and will change if the extent changes, so re-generate rather than adjusting by hand.

WHAT NONE OF THIS BUYS

Finishing makes an object feel considered. It does not make a curriculum better, and this specification should not be read as suggesting the two are related. If a choice arises between the ribbon and a heavier text stock that stops show-through on the tinted openers, choose the paper: the reader notices show-through on every page and the ribbon on none.

7 · Production checklist

Verified automatically at generation. A tick here means a machine confirmed it, not that someone remembered to.

CHECK	EVIDENCE	STATE
✓ Text block renders without error	441 pages	Verified
✓ Cover artwork built at trim plus bleed	452.6 × 303 mm	Verified
✓ Spine width calculated from the bound page count	26.6 mm at 0.115 mm per leaf	Verified
✓ Every colour pair meets its contrast floor	9 pairs checked	Verified
✓ Content digest computed over the full curriculum	RP6Y-KFPF-2NJ5-8SW9	Verified
✓ Verification code encodes a College address	https://worldwideenglishcollege.com/verify/publication/RP6YKFPF2N	Verified
✓ Editable companion built		Verified
✓ Curriculum verified present in both editions by test	tests/curriculum-publication.test.mjs	Verified
✓ Omissions registered rather than filled	10 entries	Verified

Manual steps before press

These cannot be verified by a build and are therefore listed separately rather than mixed in above, where a reader would reasonably assume they had been confirmed. **None of the following has been carried out.**

- Proof the cover at 100% on the specified stock and confirm the spine text is centred on the bound spine.
- Confirm with the printer that the guilloché line weights (0.30–0.55 pt) hold at the chosen screen ruling; below 0.25 pt fine gold line-work can drop out on uncoated stock.
- Convert to the printer's ICC profile and re-proof the blues; the CMYK figures in this document are uncalibrated starting points, not final separations.
- Confirm total ink coverage on the cover ground is within the printer's limit for the stock.
- Check that no live text falls within 5 mm of the trim on any page.
- Confirm the QR code scans from the printed sheet, not only from the PDF.

8 · Brand style guide

The rules that keep a second edition looking like the first.

The crest

A shield, an open book, six ascending bars for the six levels, and the founding letters. It carries no heraldic claim: no granted arms, no supporters, no motto. Reproduce it no smaller than 10 mm tall, always with clear space of at least half its width on every side, and never recoloured outside the system palette. It may be set as an outline on a dark ground or filled on a light one; it is never set in a colour that is not in section 3.

Rules that do not bend

- Gold is rationed. It marks conferral, ornament and rules — never body text, never a heading that is merely important. Gold used generously stops meaning anything.
- Crimson means assessment or an unmet claim. It is never used to make something look urgent.
- Two type families. A third family is a redesign, not a variation.
- Apparatus recedes. Timings, folios, captions and metadata are slate grey at the apparatus size; they are never allowed to compete with content.
- Every ornament is drawn from the system in `ornament.mjs`. A new mark is added there, with its construction, or it is not used.
- No photography of people. If a future edition commissions genuine photography of real students with their consent, it may be used; stock imagery standing in for the College may not.
- No registry number the College does not hold. ISBN, DOI and catalogue references are printed as unassigned until an issuing authority assigns them.
- Counts are computed, never typed. Every figure in the publication is derived from the database at generation, so no number can survive the thing it counts.

Identification and security

PUBLICATION ID	WEC-LC/IEFC/CUR/2026/E01
DOCUMENT ID	RP6Y-KFPF-2NJ5-8SW9
ISSUE CODE	E01.R00.01
PRINT IDENTIFIER	E01.R00.01-MXS5
VERSION	1.0.1
CONTENT DIGEST	5876867e53cf16efe2f5f225a8d95c49...
VERIFICATION	https://worldwideenglishcollege.com/verify/publication/RP6YKFPF2N

DIGITAL AUTHENTICITY NOTICE

The Document ID above is a Crockford base-32 rendering of a SHA-256 digest computed over the complete curriculum content of this edition — every level, module, item title, lesson body, assessment question, answer option and answer key. Two copies bearing the same Document ID carry identical curriculum content. A copy bearing a different Document ID is a different edition, however similar it appears. The digest covers content only: it is not a signature, it does not certify authorship, and it does not prove that this copy came from the College. For that, verify the Document ID against the record published at the address encoded in the verification code on this page.

REGISTRY FIELDS THE COLLEGE DOES NOT HOLD

ISBN: Not assigned (issued by International ISBN Agency). DOI: Not registered (issued by A DOI registration agency). Legal deposit: Not deposited (issued by The British Library). Library catalogue: Not catalogued (issued by A depository library). These are printed as unassigned in the publication. Inventing any of them would be a forgery of a third party's registry rather than a design flourish.

Components specified but absent from the source curriculum

Carried here from the Register of Omissions printed in the publication itself, so that a production house working from this document alone knows what is missing and why nothing was written to cover it.

SCOPE	COMPONENT	STATUS
Level	Level philosophy	Not authored
Level	Career opportunities	Not authored
Level	Professional and leadership outcomes	Not authored
Level	Credit value and total qualification time	Not assigned
Level	Portfolio requirement and per-skill expectations	Not authored
Module	Professional applications; recommended resources; prerequisites	Not authored
Module	Assessment map to competencies	Not mapped
Lesson	Reflection; self-assessment; portfolio task; digital task; collaborative activity; mastery checklist	Not authored
Volume	Foreword and message from the head of the institution	No officer appointed
Volume	Editorial photography	Not commissioned
